Testimonial for Twiga Aero Ltd

NokScoot brought in Twiga Aero Ltd consultants on two separate occasions to provide in-company safety training for our ground ops staff. The training included both classroom sessions as well as practical observations of the airport ramp.

Maurizio and Brenda tailored the training to address specific ground safety risks affecting NokScoot operations, leaving the participants with a realistic basis to implement effective controls.

As a result of their 'grassroots' approach, the training has led to an enhanced safety awareness, increased reporting and a reduction in the number of high risk ground safety events.

NokScoot considers Twiga Aero a trusted safety partner and will continue to call on their expertise in the future.

Anthony Houston,
Head of Safety, Security and Quality
NokScoot Airlines
